GCONSULTANT

THE POLYMATHIC PROBLEM SOLVER

BRAND SYSTEM | v1.0 CONCEPT RELEASE

Menyatukan ilmu. Menata kompleksitas. Mewujudkan solusi.

GConsultant is positioned as a polymathic strategy and systems architecture brand: connecting strategy, business systems and technology to turn complex challenges into clear, practical and measurable solutions.

Core color system

#073B2E
Core brand

Deep Forest
#0F241D
Dark surfaces

Antique Gold
#C6A15B
Accent

Illuminated Gold
#E5C97A
Light accent

Legacy Cream
#F6F1E4
Light surface

Ink
#111815
Text

01 / Brand architecture

Master brand: GConsultant. The visual wordmark is uppercase GCONSULTANT; the brand name is written GConsultant in prose and metadata. The primary public signature is THE POLYMATHIC PROBLEM SOLVER.

Supporting descriptor: POLYMATHIC STRATEGY & SYSTEMS ARCHITECTURE. Indonesian brand promise: Menyatukan ilmu. Menata kompleksitas. Mewujudkan solusi.

The internal philosophy may include “Master Polymath”, “Sage Universal” and “The Ultimate Problem Solver”, but these should be expressed through demonstrable work rather than used as unsupported superlative claims.

Logo lockup system

Primary horizontal: presentations, website and proposal covers. Stacked: covers, social campaigns and tall spaces. Compact: navigation bars and tight placements. Mark-only: favicon, app icon and avatar.

Symbol idea: a continuous geometric G suggests connected disciplines and a structured route from complexity to resolution. It avoids a generic shield, crown, laurel or pseudo-official seal.

02 / Visual language

Color roles

Token	HEX	Recommended use
Sovereign Green	#073B2E	Primary backgrounds, wordmark and text on light
Deep Forest	#0F241D	Premium dark backgrounds
Antique Gold	#C6A15B	Accent and mark on dark
Illuminated Gold	#E5C97A	Bright accent on dark green
Legacy Cream	#F6F1E4	Warm light surface and text on dark
Ink	#111815	Body text and monochrome

Typography

Display: Cormorant Garamond (or Georgia / Times New Roman fallback) for premium editorial character. UI and tagline: Inter (or Manrope / Plus Jakarta Sans / Arial fallback) for clarity. Track the tagline broadly but do not force tracking if it harms legibility. Use fonts with appropriate web/desktop licenses, and outline approved logo lettering for final production masters.

Accessibility and background safety

On dark green, use Legacy Cream or Illuminated Gold for small text. Antique Gold on cream is decorative only at small sizes; it has insufficient contrast for ordinary text. On light backgrounds, use Sovereign Green for the monogram and text; reserve gold for accents. Do not rely on color alone to communicate meaning.

Contrast is context-dependent: test actual rendered text sizes, device display, paper stock and foil process. Metallic foil appearance cannot be inferred from a HEX swatch.

03 / Usage & implementation

Minimum sizes (starting limits; verify physically)

Asset	Digital	Print
Horizontal full lockup	220 px recommended minimum	35 mm recommended minimum
Compact lockup	120 px minimum starting point	25 mm minimum starting point
Mark only	16 px test; 24 px preferred	5 mm; embroidery 15 mm

Do

Use the approved light or dark logo. Keep at least one G-stroke of clear space around the symbol and a larger comfort zone around full lockups. Use a solid or calm background, preserve the wordmark/tagline hierarchy, and use the compact lockup when text would become too small.

Do not

Do not stretch, rotate, recolor ad hoc, add shadows to the core mark, rewrite the tagline inside the logo, place it on busy imagery without a clear field, or combine the visual mark with unrelated crests or certification symbols.

Website starter included

The package includes CSS variables, an accessible HTML header snippet, a standalone responsive brand-preview page, favicon files, app icons, and an Open Graph sharing image. Paths are starter examples: adjust them to the actual CMS/theme and verify them after deployment. The primary deployment domain remains gunara.web.id; this package does not imply that a separate GConsultant domain is registered.

IP & release status

This is an implemented design concept, not trademark clearance. Search the exact word mark, variants and figurative mark in PDKI, check relevant service classes with an IP professional, and preserve source files and dated versions. No registration, ISO affiliation or certification is claimed.

Recommended status: v1.0 CONCEPT RELEASE — ready for website pilot and stakeholder review; final production approval remains subject to trademark clearance, outlined lettering and real-size output tests.
